6. Storage of any purchase shall be at the sole risk of the purchaser. Title passes upon the fall of the auctioneer's hammer, and thereafter, while the Association will exercise due caution in caring

Every lot is on public exhibition one or more days prior to its sale, after which it is sold "as is" and without recourse.

The Association exercises great care to catalogue every lot correctly, and will give consideration to the opinion of any trustworthy expert to the effect that any lot has been incorrectly catalogued, and, in its judgment, may either sell the lot as catalogued or make mention of the opinion of such expert, who thereby would become responsible for such damage as might result were his opinion without proper foundation.

Any purchase so made will be subject to the above Conditions of Sale, which cannot in any manner be modified. 293—BLUE AND WHITE GARNITURE OF FIVE PIECES

(A) Three Tall Blue and White Beakers of the Eight Immortals (*K'ang-hsi*). Inverted pear-shape body with expanding foot and wide trumpet neck. The entire neck and body covered, between narrow hatch borders on each, with a lattice in pale blue, interrupted by eight broadly outlined foliate medallions, each carrying a figure painted in two tones of blue on the white reserve, and all done with expressive precision. Martial Chung-li Ch'üan—messenger of heaven—with his sword, is seen below Chang Kuo conjuring his mule from a gourd, Chang Kuo being a Celestial and second Elijah who ascended to heaven without suffering bodily dissolution, in the eighth century A.D. Ts'ao Kuo-ch'in appears with his castanets, and Han Hsiang-tz'u, who fell from the peach tree of the Genii into immortality, is playing upon a flute. Li of the Iron Staff leans upon his beggar's crutch, exhaling his spiritual essence toward the clouds; aged and disillusioned Lan Ts'ai-ho holds a scroll, and Lü Tung-pin of robust frame holds a basket of strange plants in lieu of the customary sword. Ho Hsien-Ku, who was born with six hairs on the top of her head, and, after eating of mother-of-pearl at the age of fourteen to attain immortality, wandered lonely in the hills, speeding with the wings of virginity, stands here like a "Long Eliza" smiling at space. Mark, a firmly penciled blue leaf beneath the glazed foot.

Height, 17½ inches.

(B) Two Blue and White Temple Jars with Hat-shape Covers (*K'ang-hsi*). Ovoid body with high shoulder, gracefully contracting below and recurving to the spreading foot; short cylindrical neck. On a ground of light blue lattice, foliate medallions are broadly outlined, their white reserve enclosures adorned each with one of the Eight Immortals in a landscape setting; six appear on the body, two on the cover. Narrow angular borders encircle base and shoulder, and the white neck wears a circlet of upward-pointing leaves in outline. Mark, the blue double ring.

Height, 16¼ inches.

Before him are two robed figures, facing each other at a distance of a few paces, holding what might be short swords and might be symbols, and in attitudes such that it is difficult for the Occidental mind to determine whether they have been commanded to do away with themselves or are about to complete some function or ceremony before the mighty one, who carries a conventional leaf. On the neck, scroll and foliate borders.

Height, 17½ inches.

624—PALE CELADON VASE (*K'ang-hsi*)

Cylindrical at the base, the body expands to a bulbous center, contracting again by a gentle slope to a slender bottle-neck with slightly spreading lip. Dense porcelain, covered with a monochrome glaze of dull luster in the palest of sea-green tints, like the smother of air-churned turbulent water swirling in the shallows among tortuous shore-rocks.

Height, 10½ inches.

625—CELADON JAR WITH RING NECK (*Ming*)

Inverted pear-shape, the juncture of shoulder and neck marked by raised modeling in the paste, the neck short and marked midway by another raised modeling in the paste giving the effect of a ring; lip slightly everting. Coated with a sea-green glaze of even quality except where it thickens and deepens in tone above the raised modelings, leaving their edges light.

Height, 8¼ inches.

626—PALE CELADON VASE (*Ch'ien-lung*)

626

Globular bottle-shape on low, slightly spreading foot, with short slender neck and bulbous lip. Modeled in the paste are conventional petal borders at base and lip, and a ring around the neck. Covered with a luminous monochrome glaze of purest sea-green tint, very pale, the glaze deepening in hollows of the decoration, darkening in tone and so bringing out the details of the modeling. Has stand.

Height, 7¼ inches.

627—CELADON GLOBULAR BOTTLE (*K'ang-hsi*)

With defined foot, and slender neck slightly expanding at the lip. Dense, sonorous porcelain, coated with an even sea-green glaze, the body decorated with blossoms involved with scrolling foliations etched in the paste. Has stand.

628—CELADON VASE (*Sung*)

Inverted pear-shape, slightly spreading at the foot, with high, full, round neck expanding abruptly at the lip. The lower body fluted, the upper body encircled by a scrolling vine modeled in relief, and the neck carrying three upright leaf groups in relief modeling. Brilliant sea-green glaze, effectively varying and giving a shimmer to the surface as it accumulates in and about the reliefs and spreads thin and almost white over their higher details.

Height, 11 inches.

629—CELADON OVOIDAL JAR (*Ch'ien-lung*)

Heavy sonorous porcelain, covered with a dense glaze of bright sea-green tone and dull luster, the glaze continued in the interior and underneath the modeled foot.

630

On convex foot; characteristic short neck, the lip slightly everting; without handles. Coated with a delicate light sea-green glaze of brilliant luster, over a decoration modeled in the paste and etched, consisting of medallions enclosing the phoenix and dragon, with wave forms, fire and cloud scrolls, and palmate borders and an encircling flower and leaf motive. Has carved teakwood stand.

Height, 7½ inches.

631—CELADON GINGER JAR WITH TEAKWOOD COVER (*K'ang-hsi*)

Ovoid. Dense sonorous porcelain, with an extensive decoration, covering most of the surface, modeled in the paste. At the base is a deep border of scrolling petals, and at the shoulder are borders of scepter-heads and the key-fret, while the body is encircled by a wide band of floral scrolls and foliations, the whole covered with a brilliant celadon glaze of bluish-gray tone with a giant crackle in dark brown lines. The cover has a white jade medallion, carved and pierced. Has teakwood stand.

Height, 8½ inches.

632—CELADON GALLIPOT OR INVERTED PEAR-SHAPE VASE (*Ming*)

Modeled in five lobes as of sections of a fruit, giving a pentafoil rim and foot. Coated with a rich glaze of celadon quality in which the green note has almost entirely given way to a gray, the glaze traversed by a bold, emphatic crackle in brown and black lines. Glaze continued within neck and underneath foot; rim and edge of foot glazed in black. Has stand.

Height, 11¾ inches.

633—CELADON BOTTLE-FORM VASE (*Ming*)

Squat body in the form of a melon of many narrow lobes, somewhat compressed, on a low circular foot, and with a tall, full, cylindrical neck. The lobes are modeled in the paste, largely by incision, and above the melon a foliate border is modeled and etched where the shoulder joins the spreading root of the neck. The neck itself has a decoration of bamboo trees and lotus plants carved in the paste, and extending nearly to a serrate border under the rim. The whole covered with a light sea-green glaze which takes a brownish trend in effect owing to the presence of a well-defined crackle in brown lines, the decoration being effectively brought out by the thickening of the glaze and its deepening in color in the depressions.

Height, 14¾ inches.

634—TALL OVIFORM CELADON VASE (*Yung Chêng*)

Of graceful contour, the body slightly spreading from the low waist to meet a heavy convex foot, the high sloping shoulder recurving in the neck, which expands in a lightly flaring lip. Dense, sonorous porcelain with a glaze of pure sea-green tone wonderfully worked in representation of sea water when churned and lightened by millions of small air bubbles—the effect produced within the glaze by what appear to be innumerable minute bubbles, some of which are represented at the surface by infinitesimal depressions which produce there the equivalent of the “orange-peel” finish.

Height, 16 inches.

635—GRACEFUL CELADON JAR (*Ming*)

In inverted pear-shape or enlarged gallipot form, the high globular body contracting gently and tapering to a narrow foot; short cylindrical neck. Heavy sonorous porcelain, covered with a dense glaze of light sea-green tone and mirror-like brilliancy.

Height, 15½ inches.

636—CELADON JAR WITH TEAKWOOD COVER (*Ming*)

Colossal inverted pear-shape with heavy foot deeply recessed. Covered with a brilliant glaze of sea-green tone and metallic luster and marked by a bold crackle in brown lines. Glaze continued in the interior; bottom pierced. Cover carved in relief with fungus scrolls and grotesque animal-heads, and surmounted by a vermilion lacquer knob handle lightly etched with plant forms and having three small seal marks impressed. Has elaborately carved teakwood stand.
